

Press release

Nexans cables to play key role at Qatar's new condensate refinery

CCJV has placed a major order for Nexans power and instrumentation Fiber Optic cables for the Laffan Refinery 2 project in Doha.

Paris, July 23, 2014 – Chiyoda and CTCI have been jointly awarded the contract for the engineering, procurement, supply, construction and commissioning portion of Laffan Refinery 2 project by Qatargas. It will have a condensate processing capacity of 146,000 BPSD.

CCJV, the joint venture between Chiyoda, leading engineering, procurement and construction firm for Oil & Gas, and CTCI Corporation, Taiwan's largest engineering, procurement and construction firm, has chosen Nexans to provide all its power and instrumentation cable needs for the construction of Laffan Refinery 2 in Doha, Qatar. Under the contract, Nexans will provide over 1000 km of cable designed to suit the demanding requirements of the oil and gas industry, including low and medium-voltage single and multi-core armoured IEC standard flame retardant cables.

The Laffan Refinery 2 project further reinforces Nexans' position in Qatar's oil and gas industry which is making heavy investments in new projects to fulfil State of Qatar 2030 vision. In 2013, Nexans provided 1000 km of medium and low voltage cables for the Barzan gas processing project.

Charles-Edouard Mellagui, Country Manager and CEO of Qatar International Cables Company (QICC), the Nexans company based in Qatar, said: *"Winning this major contract for such a high profile and strategic project is an important step for the contribution of the Nexans Group to Qatar 2030 vision and its underlying will to accelerate its industrial development. With our QICC footprint, Nexans is well positioned to deliver innovative, competitive cable products for Qatar's oil and gas projects."*

For Laffan Refinery 2 project, Nexans QICC will design and manufacture 1000 km about of low and medium voltage, power and earthing cables, while Nexans France will provide the instrumentation cables and Fiber Optic cables. Construction of the refinery began in December 2013, and it is expected to be completed in the 3rd quarter 2016.

About Nexans

Nexans brings energy to life through an extensive range of cables and cabling solutions that deliver increased performance for our customers worldwide. Nexans' teams are committed to a partnership approach that supports customers in four main business areas: Power transmission and distribution (submarine and land), Energy resources (Oil & Gas, Mining and Renewables), Transportation (Road, Rail, Air, Sea) and Building (Commercial, Residential and Data Centers). Nexans' strategy is founded on continuous innovation in products, solutions and services, employee development, customer training and the introduction of safe, low -environmental- impact industrial processes.

In 2013, Nexans became the first cable player to create a Foundation to introduce sustained initiatives for access to energy for disadvantaged communities worldwide.

We have an industrial presence in 40 countries and commercial activities worldwide, employing close to 26,000 people and generating sales in 2013 of nearly 6.7 billion euros. Nexans is listed on NYSE Euronext Paris, compartment A.
