

BOOSTED TO THE NEXT LEVEL LANactive V5

Proven design and fully backward compatible

Ramped up to boost your LAN performance

+250 000 switches installed

LANactive offers an alternative approach to traditional LAN using Fibre To The Office (FTTO) topology and active switches to provide standard Ethernet services to devices via standard copper-based RJ45 technology.

This high-performing solution is ideal for large scale infrastructures in a range of environments including education, hospitals, airports, police & defense and public administration.

Quick and reliable traffic of increasing numbers of data packets
